

As per IAY guidelines, an amount up to Rs. 50.00 lakh (including the State share) per district can be released to meet the exigencies arising out of the natural calamities like floods which is sufficient for construction of 200 houses per district only. For this purpose, the State Government may send a proposal along with requisite documents such as district-wise number of houses damaged due to floods, Block-wise, Village-wise list of BPL beneficiaries whom the assistance is to be provided. However, these details have not been provided by the Government of Andhra Pradesh so far. The State Government has since been informed about this.

Safe drinking water for every village

1613. SHRI B.J. PANDA:

SHRI RAVULA CHANDRA SEKHAR REDDY:

MS. PRAMILA BOHIDAR:

Will the Minister of RURAL DEVELOPMENT be pleased to state:

(a) whether the Centre proposes to provide every village and every hamlet in the country with safe drinking water;

(b) if so, the details thereof, alongwith the progress achieved so far, State-wise in terms of hilly/tribal areas;

(c) what is the total number of villages in Orissa which are yet to be covered under the project; and

(d) the time-frame within which all these villages/hamlets will be provided the safe drinking water?

THE MINISTER OF STATE IN THE MINISTRY OF RURAL DEVELOPMENT (SHRI CHANDRA SEKHAR SAHU): a) and (b) Yes, Sir. Rural Drinking Water is a State subject. The Central Government, however, supplements the efforts of the State Governments in this direction by providing financial and technical support through a Centrally sponsored scheme namely Accelerated Rural Water Supply Programme (ARWSP). The State Governments are competent to plan, sanction, implement and execute rural water supply projects from the funds

provided under ARWSP. A rural habitation in which the arrangements for supply of drinking water @ 40 lpcd within a distance of 1.6 km. in plain and 100 mts. elevation in hills have been made is categorized as fully covered. In case the availability of drinking water is less than 40 lpcd, but more than 10 lpcd, such a habitation is categorized as partially covered. The habitations where the availability of drinking water is less than 10 lpcd are categorized as not covered. As per CAP 99—out of 14.22 lac habitations there were 55067 habitations (Not Covered and Partially Covered) in the country as on 1.4.2005 without safe drinking water. Orissa did not have any uncovered habitations of CAP 99. Subsequently there have approximately 28016 habitations that have been reported to have quality problem in Orissa apart from some habitations that may have slipped back to partial covered status. The Central Government gives financial assistance for tackling quality affected habitations on cost sharing norms of Central: State (75:25) ratio. Statement is enclosed (See below). The annual and national per capita availability of water (surface and ground water) as per population Census of 2001 is 1820 cubic meter. State-wise per capita availability and availability of water in terms of hilly/tribal areas is not maintained at the central level.

Bharat Nirman which has been conceived as a plan to be implemented in four years, from 2005-06 to 2008-09 for building rural infrastructure envisaged that Every habitation to have a safe source of drinking water. This project envisages coverage of uncovered habitations of CAP 99 as well to tackle quality affected and slipped back habitations.

(c) and (d) Since the States/UTs plan and utilize funds under ARWSP at their level, village-wise details are not kept at the Central level.

Statement

Status of slipped Back habitations as on 1.4.2006
